*Early Bird must be received by 2/3/2015.

Lunch and refreshments included.

Support of the Dental Seminars directly benefits the ULM Dental Hygiene Program.

Cancellation/Refund Policy: All sessions require a minimum enrollment to be offered. You will be notified by our office if a session is cancelled due to insufficient registrants. If a session is cancelled, you will receive a full refund within two weeks. If you choose to cancel your registration, please notify the Division of Continuing Education as soon as you determine you are unable to attend so a refund may be considered. Any cancellation made prior to the start of the session will be subject to a cancellation fee of at least 10% of the registration fee. Cancellations made less than 48 hours prior to the start of a session do not qualify for a refund. However, participants may transfer to another offering with no penalty. Substitutions will be allowed. “No Shows” are not entitled to a refund, but may appeal for refund consideration.

DIRECTIONS

TO ULM
ULM is north of I-20. To get to ULM from I-20, take the Bastrop exit and travel north on US HWY 165. From US HWY 165 take the DeSiard Street exit. After turning right on DeSiard, travel east until the second traffic light at the intersection of Bayou Drive and DeSiard. Enter the campus using Bayou Drive. A parking area will be found on the right, adjacent to the University House. Visitors may use any available parking area except those marked as reserved (numbered red) or handicap parking spaces. Enter the Conference Center entrance to the Library. Take elevators to the 7th floor.
"BETWEEN A ROCK AND A HEART PLACE" CARDIOVASCULAR MEDICATIONS AND THEIR DENTAL CONSIDERATIONS

OVERVIEW: This program will provide participants with an overview of cardiovascular systemic diseases and the medications used in their treatment. Specific emphasis will be placed on planned dental treatment modifications. Participants will benefit from a discussion of the current strategies regarding the safe and effective use of aspirin, Plavix, Coumadin, Pradaxa, aspirin and other related agents.

OBJECTIVES: 1. List the different classes of antihypertensive agents including pharmacologic effects and adverse reactions. 2. Define coronary artery disease and hyperlipidemia and review the classes of medications used in their treatment. 3. Identify the most common indications for the use of antithrombotic agents and patient care considerations. 4. Discuss cognitive heart failure and the pharmacologic effects and adverse reactions of cardiac diuretics. 5. Describe the various dental treatment modifications necessary for patients with cardiovascular disease.

“HURTS SO GOOD!” MANAGEMENT OF POST-THERAPEUTIC DENTAL PAIN AND PATIENT CARE CONSIDERATIONS

OVERVIEW: Management of post-dental pain is accomplished with the use of opioid and non-opioid analgesics. Since the treatment of such pain usually occurs outside the dental office and relies heavily on individual factors, it is essential for the dental practitioner to assess the efficacy of analgesics and monitor for their appropriate use. This program will provide participants with an overview of the basic pharmacology of opioid and non-opioid analgesics. Special emphasis will be given to appropriate prescribing practices for practical application in everyday clinical situations.

OBJECTIVES: 1. List the different classes of antihypertensive agents including pharmacologic effects and adverse reactions. 2. Define coronary artery disease and hyperlipidemia and review the classes of medications used in their treatment. 3. Identify the most common indications for the use of antithrombotic agents and patient care considerations. 4. Discuss cognitive heart failure and the pharmacologic effects and adverse reactions of cardiac diuretics. 5. Describe the various dental treatment modifications necessary for patients with cardiovascular disease.

"ESTHETIC REHABILITATION TO TOTAL RECONSTRUCTION: CLINICAL APPLICATIONS AND DESIGN CONCEPTS"

OVERVIEW: This great opportunity to spend time with Dr. Tyler Lasseigne, one of the premier educators in dental aesthetics and comprehensive reconstruction. In this special interactive program, Dr. Lasseigne will provide clinical checklist, shortcuts to the literature that will guide through complex restorative situations involving full mouth reconstruction and implant therapy. The attendees will learn to select the most appropriate material based on mechanical and physical properties. They will also learn contemporary treatment concepts to total rehabilitation and how to optimize the soft tissue emergence during implant therapy. Furthermore, Dr. Lasseigne will demonstrate techniques to achieve higher quality restorations and implant an increased understanding of comprehensive treatment planning. Take advantage of this unique opportunity to spend quality time learning techniques to achieve greater patient satisfaction.

"ESTHETIC MANAGEMENT OF COMPLEX IMPLANT REHABILITATIONS: PROVIDING SOLUTIONS FOR OPTIMUM SUCCESS"

1. Esthetic optimization of the single anterior implant. 2. Immediate vs. delayed implant placement protocols. 3. Treatment strategies for replacing multiple missing teeth in the aesthetic zone. 4. Contour optimization of implant supported restorations. 5. Porcelain vs. zirconia. 6. Adhesive bonding for replacing missing teeth. 7. Optimum tissue control with immediate and delayed provisional.

BIографIcAl SKEtCH: Dr. Lasseigne is an Assistant Clinical Professor in the Department of Prosthodontics at Louisiana State University School of Dentistry in New Orleans, Louisiana. He received his prosthodontic education in prosthodontics at LSUUSD with his primary interest in implant dentistry and dental laboratory technology. Dr. Lasseigne also has a private practice limited to comprehensive restorative dentistry in Baton Rouge, Louisiana. He serves as adjunct faculty at University of Louisiana at Monroe University School of Dentistry and Louisiana State University School of Dentistry. Aside from private practice, Dr. Lasseigne lectures internationally and has authored several publications on comprehensive aesthetic treatment.

"COMPOSITE BONDING: THE ULTIMATE ESTHETICS"

OVERVIEW: Composite is the most versatile material available for making minor or major changes in dental appearance. With proper technique, the function and longevity of composite restorations of porcelain while providing benefits other materials can't. He is a fellow of the American Board of Cosmetic Dentistry and spent years as an Examiner for the Academy of Cosmetic Dentistry. He is an expert educator in Chicago. He has been published and honored to have as many opportunities to lecture nationally and internationally. Over the years, his private practice in suburban New Orleans, The Smile Design Center, has become limited to Cosmetic Dentistry. He has been involved in a duplication to the belief that "esthetics" and "esthetics" are not only compatible, but can take dentistry to a new level of satisfaction and success.

Dr. Willhite's seminar is sponsored in part by Cosmedent, Inc.
